## **AFFIDAVIT OF SEAN CANTON**

State of California

Santa Cruz County

I, Sean Canton, attest that my statements are true to the best of my knowledge.

**Comment** round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Sean Canton . My address is 7250 Viewpoint Dr. Aptos, CA 95503
2. I am a software developer who recently stopped working with a utilities services company which extensively utilized smart meter technology in the office place. After 8 months of working there, I developed tinnitus in the ear which was closest to the power closet, one that contained several wireless smart meters. This is an ongoing condition which greatly affects my productivity, happiness and sense of well being.
3. I have noticed a direct correlation between an increase in tinnitus to proximity to smart meters installed on residences. I have viewed apartments which aggravate the condition in bedrooms and bathrooms, only to find that smart meters were installed directly outside the rooms in question.
4. We are continually awash in high energy electromagnetic waves. They invisibly fill our air, our work, our homes and invade our bodies, without our consent, not for the public good and entirely for private industry profits. As with many endeavors, we have moved forward with technological progress before the ramifications of our actions can be measured. The FCC is the only regulating organization that can stop this ongoing violation.

5. I would urge the FCC to change the RF standards and safety regulations to err on the side of caution until comprehensive biological studies can be performed and the actual public risk of widely using wireless technologies can be assessed.

Respectfully submitted by

Sean Canton
